- 12 Assess the role of computers to a clothing manufacturing firm. [4]

## Section B [30 marks]

Read the following case study and answer **all** the questions that follow.

### KEMBO TILES LTD

Kembo Tiles Ltd is a reputable manufacturing company in Zimbabwe which produces quality and reliable roofing products, mainly roofing tiles.

The harsh economic climate has presented some challenges to most manufacturing businesses in Zimbabwe and Kembo Tiles Ltd has not been spared. Some of the challenges include increasing level of unemployment, limited access to credit facilities and increasing competition from cheaper imports.

Recently Faith Rudairo, the Managing Director of Kembo Tiles Ltd, attended a workshop whose theme was centred on survival strategies for businesses in harsh economic environments. At the workshop Faith was mostly interested in the presentation by a Japanese team which dealt on production techniques in line with lean manufacturing.

In her feedback meeting with her immediate managers Faith explained her new approach to business which would change the fortunes of Kembo Tiles Ltd. This approach involved adopting and implementing lean production methods like just in time, computer aided designs, time based management, Kaizen (continuous improvement) and team working.

All the managers present at the meeting were excited by the envisaged change except for the Human Resources Manager who looked worried, questioning himself, "How is the workforce at large going to react to this envisaged change?"

- 13 Explain the elements in the harsh economic climate that affected Kembo Tiles Ltd. [10]
- 14 Discuss the likely reactions to the envisaged change by the workforce of Kembo Tiles Ltd. [10]
- 15 With reference to the lean production methods mentioned by the Managing Director of Kembo Tiles Ltd, evaluate lean production. [10]
